DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-10 and 19-30 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 and 19-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yao (US5777778) in view of Yao (US5917179).

With respect to claims 1-2, 6-10, and 19-30, Yao'778 shows in Fig.10 a single frequency DBR laser 1000, a RF filter 1016, a fiber coupler 1002, and an optical path coupling an output of the filter 1016 to the laser. Yao'778 lacks a modulator coupled to the output of the laser 1000. Yao'179 teaches a modulator 220 coupled to the output of the laser in Fig.5A. For the benefit of generating two optical sidebands, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Yao'778 a modulator coupled to the output of the laser as taught by Yao'179.

Art Unit: 2828

With respect to claims 3-5, Yao'179 discloses a Mach-Zehnder modulator, an electro optic modulator, etc. (col.7, 1.44-50).

With respect to claims 31-34, Yao'179 shows in Fig.5A an isolator 270.
